

-- 8. The method for detecting the anti-virus activity according to claim 4 wherein said virus is Influenza A virus. --

New Abstract of the disclosure:

Please amend the application by adding the attached Abstract of the Disclosure as page 26 of the translation of the application filed herewith, after the claims and prior to the drawing sheets.

Remarks

The sequences in the original and substitute Sequence Listings are identical. The substitute Sequence Listing has been prepared with the Patent Office's preferred PatentIn software and is accompanied by the requisite computer-readable copy and statement.

The amendments to the claims are merely intended to minimize the filing fee and are not intended to change the scope of the claims. The Applicant does not intend by these or any other amendments to abandon the subject matter of any claim as originally filed, and reserves the right to pursue such subject matter in this application or related applications, such as continuing applications.

The Abstract of the disclosure is identical to the abstract found on the cover of the published PCT application from which the present application is derived, and it finds support throughout the application.

Respectfully submitted,

MARSHALL, O'TOOLE, GERSTEIN,
MURRAY & BORUN
